Life in the Farmhouse

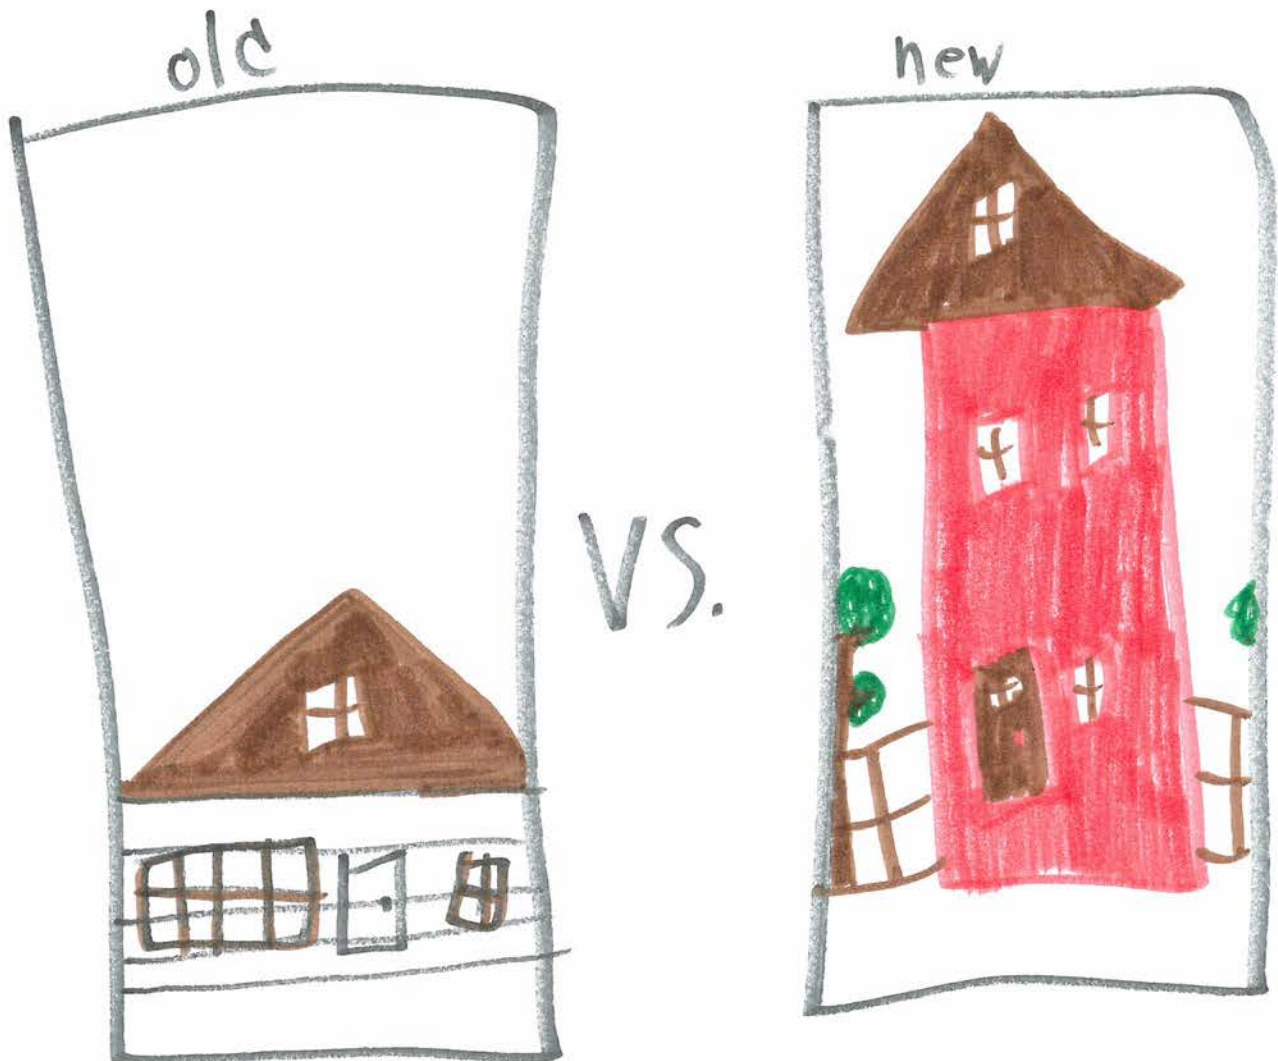

At first, Penny didn't want to move when she was 6 years old. She loved her house, her room, and her backyard. Everything was perfect. Except, she didn't have a pet. For years, she had been asking her mom and dad for a dog, cat, or a goldfish. But that didn't happen. Penny's sister, her brothers, and her had never had a pet at their old house. Since moving was their parent's decision, they decided to move into a bigger house...they moved into a farmhouse!

It was hard to move for Penny and her siblings. She even hugged her bedroom in her old house before moving out! But, it was all worth it. At their new house, she had everything her old house had plus more! She didn't have the same house, bedroom, and backyard, but she did have a different house, bedroom, and backyard! There are a lot of trees and grass. Penny's new house is perfect! Even though nothing would be the same again, she still loved her new house!

The best parts about her new house are: Penny's parents finally got their family a kitten, she had a big backyard, lots of trees, a trampoline, a playhouse, and a swing set! She had her own bedroom, so now she didn't have to share with her sister. Additionally, her house is bigger than the old house.

As you can see, Penny's new house is really great for her family!
She loves playing with her cats, reading by the window, jumping on the trampoline, swinging on the swing set, and playing with her Barbie dolls. The new house wasn't as bad as she thought it would be. In fact, the new house was even better than Penny's old house!

She still misses her former home, but she **LOVES** her new home!
Everything is perfect! Penny just loves her life in the farmhouse!!!!
